

New from Absorbine® - Stall Safe® Disinfectant and Sanitizer

It's Germ Warfare!

New Stall Safe brand disinfectant and sanitizer is EPA approved as an effective way to kill and prevent the spread of contagious viruses and bacteria. Horse owners can now help prevent disease outbreaks by regularly disinfecting and sanitizing barns, stalls, trailers, and equipment with Stall Safe brand disinfectant and sanitizer, from Absorbine – “The Horse World’s Most Trusted Name®.”

Stall Safe is a proven virucidal (destroy viruses), antibacterial, and mildewstat (inhibits mildew growth). It is more effective than most chemicals, including bleach, ammonia, iodine, and pine cleaners. Studies have shown that a number of viruses can be killed with regular use of disinfectants such as Stall Safe. Recent outbreaks of Equine Herpes Virus-1 have caused horse owners to start questioning the cleanliness and safety of stalls and barns they utilize both at home and while traveling. Regular use of Stall Safe can eliminate staphylococcus aureus, salmonella, porcine rotavirus, and infectious bovine rhinotracheitis virus. Use it in the barn or trailer and on buckets and equipment. It also eliminates unpleasant odors.

Stall Safe provides a scientifically strong solution to protect your horse’s environment against germs and diseases. The preventive use of Stall Safe in a stall before your horse enters it will help eliminate potential problems. Available in a handy kit containing a bottle of Stall Safe concentrate, one ergonomically comfortable gallon bottle for mixing, and a unique motorized sprayer for ease of use, Stall Safe is available from Absorbine, the trusted name in animal health care. The concentrate makes two gallons; each gallon can treat the walls and floors of four stalls or more. Suggested retail price for the kit is \$24.99, with the 2-ounce concentrated refill available at a suggested retail price of \$11.99. Stall Safe is not currently available in California or New York.

Protect your horse by protecting their environment with Stall Safe from Absorbine.
